## Overview

### Requirement and purpose

The state of Washington owns and leases thousands of facilities that house state agencies. This represents a significant financial investment by the citizens of Washington. To monitor this investment, the Office of Financial Management (OFM) gathers and reports the state's facilities inventory from state agencies as prescribed in [RCW 43.82.150](#). This document is a summary of the data reported in 2017.

A facility is defined as a building or other structure with at least one wall, a roof and a permanent foundation, regardless of occupancy. Facilities in the inventory range from residences and classrooms and office buildings, to grain elevators and node sites -- and more.

The state facilities inventory is used to inform the state's Six-Year Facilities Plan, capital budget decisions, comprehensive emergency management planning and other analyses related to state facilities.

### 2017 facilities inventory results

As of October 2017, 72 state agencies<sup>1</sup> and higher education institutions reported 10,542 facilities totaling just over 116.3 million square feet. Approximately 88.2 percent of these facilities are owned by Washington state agencies. The remaining 11.8 percent consist of leased facilities. State facilities are located in every county, with Garfield County having the fewest (21) and King County having the most (1,301).

Since 2016, the state's facilities inventory has increased by over 1.5 million square feet. The change between 2016 and 2017 is largely the result of new construction and improved reporting in higher education. Modest decreases were reported in the human services and natural resources functional areas.

The 2017 facilities inventory, including the facility owner, location, type, condition, size of each facility and other pertinent facility data, is available at <https://www.ofm.wa.gov/facilities/state-agency-facility-oversight/facilities-inventory>.

### New facilities portfolio management system

Over the past year, OFM worked with state agencies to acquire and successfully deploy a new technology solution to gather and report the state's facilities inventory. This new system has improved the accuracy of the state's facilities inventory by providing a stable platform to collect, validate and store data from all reporting state agencies. It also provides greater visibility into how leased facilities and lease contracts relate to one another. As a result, this report now contains clarification of the number of leased facilities and associated lease contracts.

More information about this new enterprise wide technology solution is available at <https://www.ofm.wa.gov/facilities/state-agency-facility-oversight/facilities-inventory/facilities-portfolio-management-tool-fpmt>.

---

<sup>1</sup>All state agencies and higher education institutions were contacted to report their 2017 facilities inventory. All agricultural commissions are exempt from reporting per [RCW 15.04.200](#). Most legislative and judicial agencies did not report back to confirm data for their agencies for the 2017 inventory report. This report does not include K-12 school facilities.

## Statewide Facilities Summary

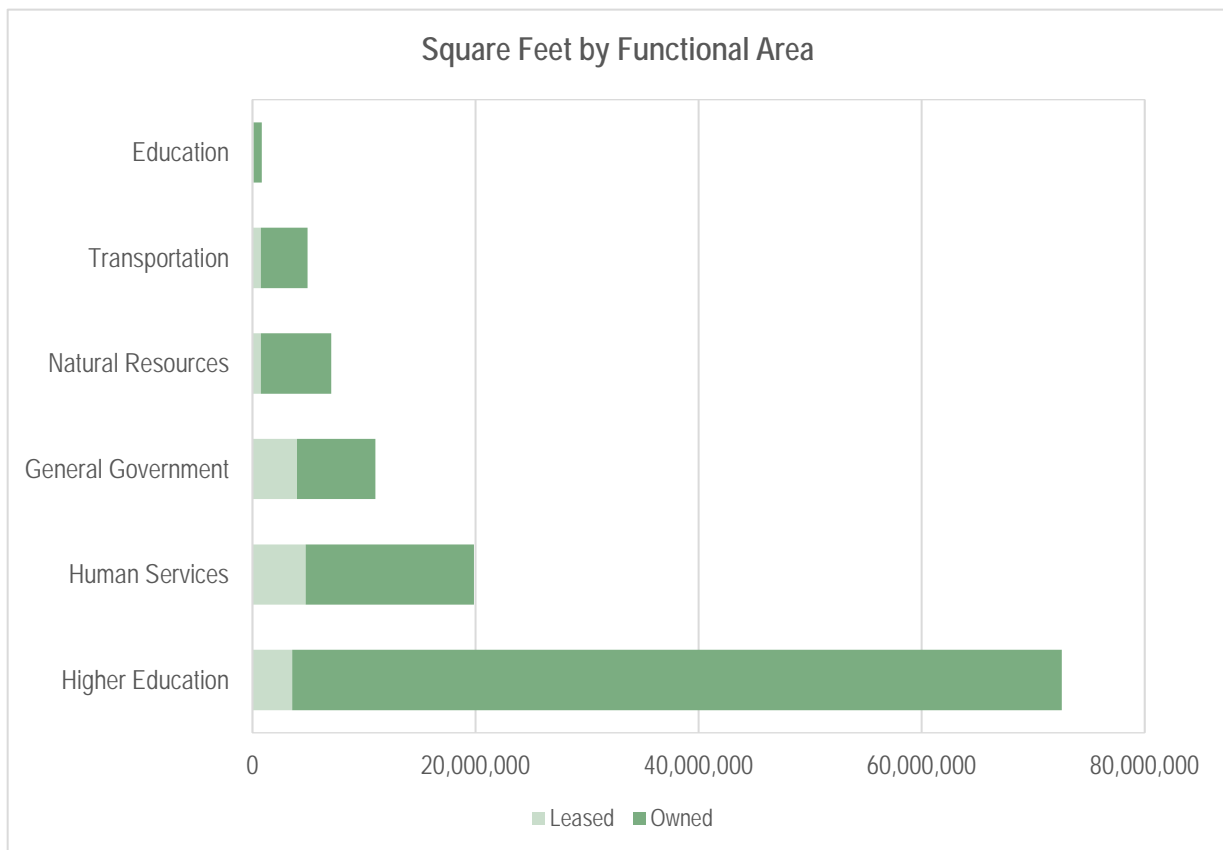

The state of Washington owns, maintains, leases or occupies 10,542 facilities statewide. These facilities represent the state's physical presence in the communities it serves. State employees, volunteers, contractors and community partners perform a large variety of functions in these facilities such as educating citizens, providing social services, licensing businesses and auditing government operations. Many of the state's facilities also serve as residences and prison facilities, and support various functions.

### Total facility inventory summary

In fall 2017, 72 state agencies reported a total of 116,267,925 square feet. Thirty agencies reported 9,422 owned facilities, totaling 102,372,626 square feet. Sixty-eight agencies reported 1,120 leased facilities, totaling 13,647,341 square feet. Based on square footage, 88.2 percent of the state's facilities inventory is owned and 11.8 percent is leased from the private sector.

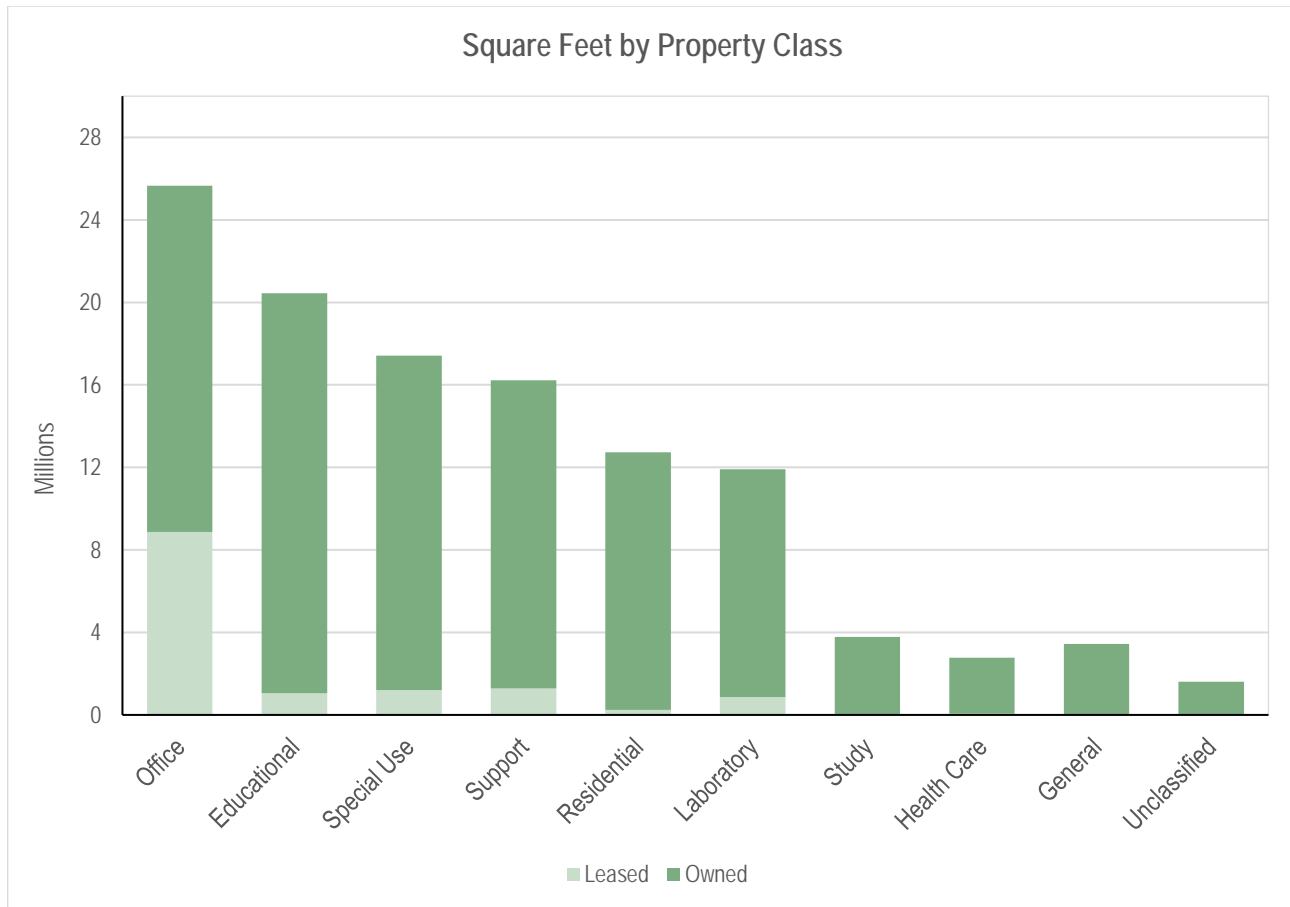

### Square feet by functional area

The chart below depicts the percentage of owned versus leased square footage by functional area. The owned square footage that higher education occupies dwarfs all other functional areas.

### Square feet by property class

The chart below breaks down total square footage by property class for the full inventory. Property class is defined as a broad category of space composed of specific space type such as office-administrative. As with previous reports, the facilities inventory continues to indicate that facility assets are primarily used for educational, general office and health care activities. The inventory indicates leased facilities overwhelmingly are used for office space, with almost 64 percent of the total leased space.

### Building condition summary

Agencies are asked to rank the general condition of each facility in their respective inventory on a scale of 1-Superior to 5-Emergency Use Only. Condition is assessed on factors such as exterior, interior, lighting, maintenance levels and building system reliability. The following table depicts the condition of all state facilities based on this scale.

Agencies generally ranked facility conditions as either “adequate (2)” or “fair (3).” Few leased facilities are categorized as “poor condition-limited (4)” or “emergency use only (5).” A total of 6.1 percent of the current inventory is rated as being for emergency use only due to poor facility condition.

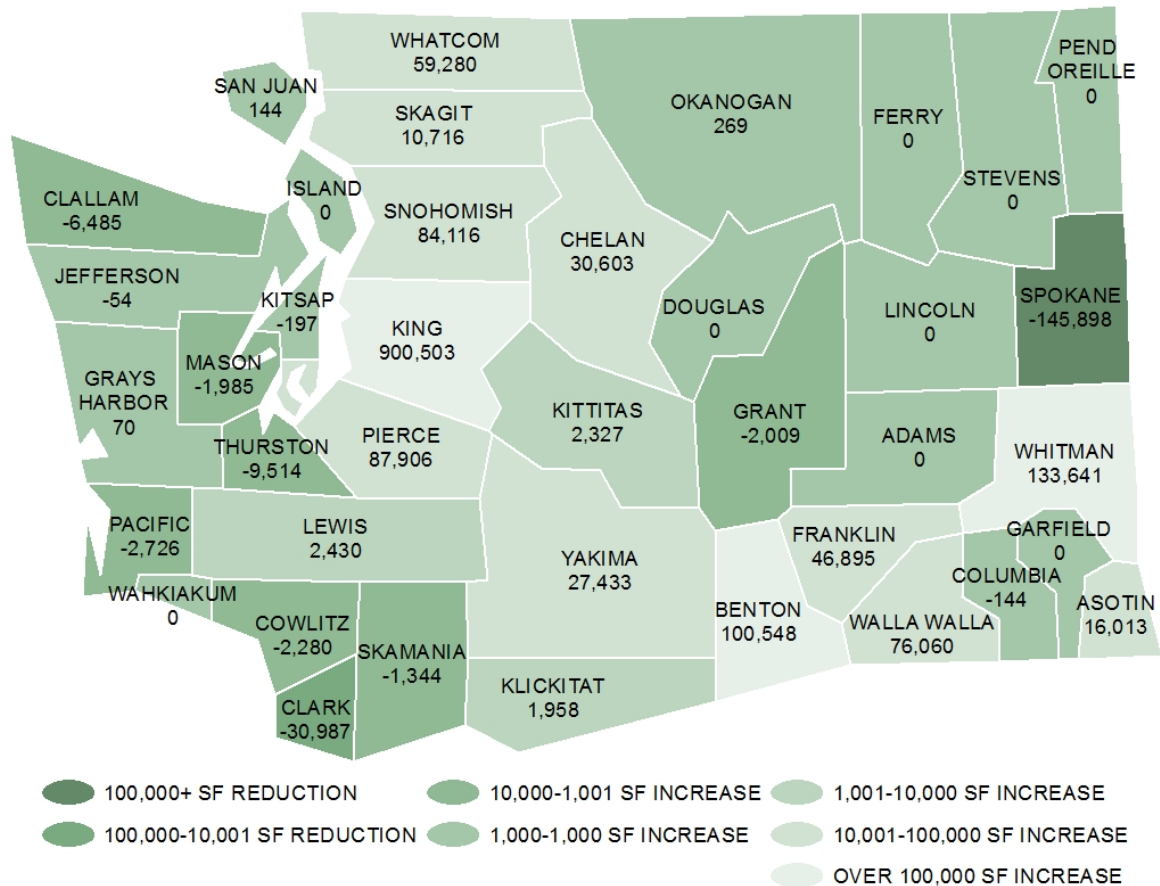

Facilities Count by Condition Rating

## Owned square feet change by county

The inventory of state facilities increased by nine facilities and 1,377,289 square feet from 2016 to 2017. The map below shows the owned square footage change from the past year. Total owned square footage significantly increased in King, Whitman and Benton counties. These increases are primarily the result of new construction and purchases at the University of Washington, Washington State University and Columbia Basin Community College, respectively. Over 200,000 square feet was added to the inventory as the result of improved reporting by agencies.

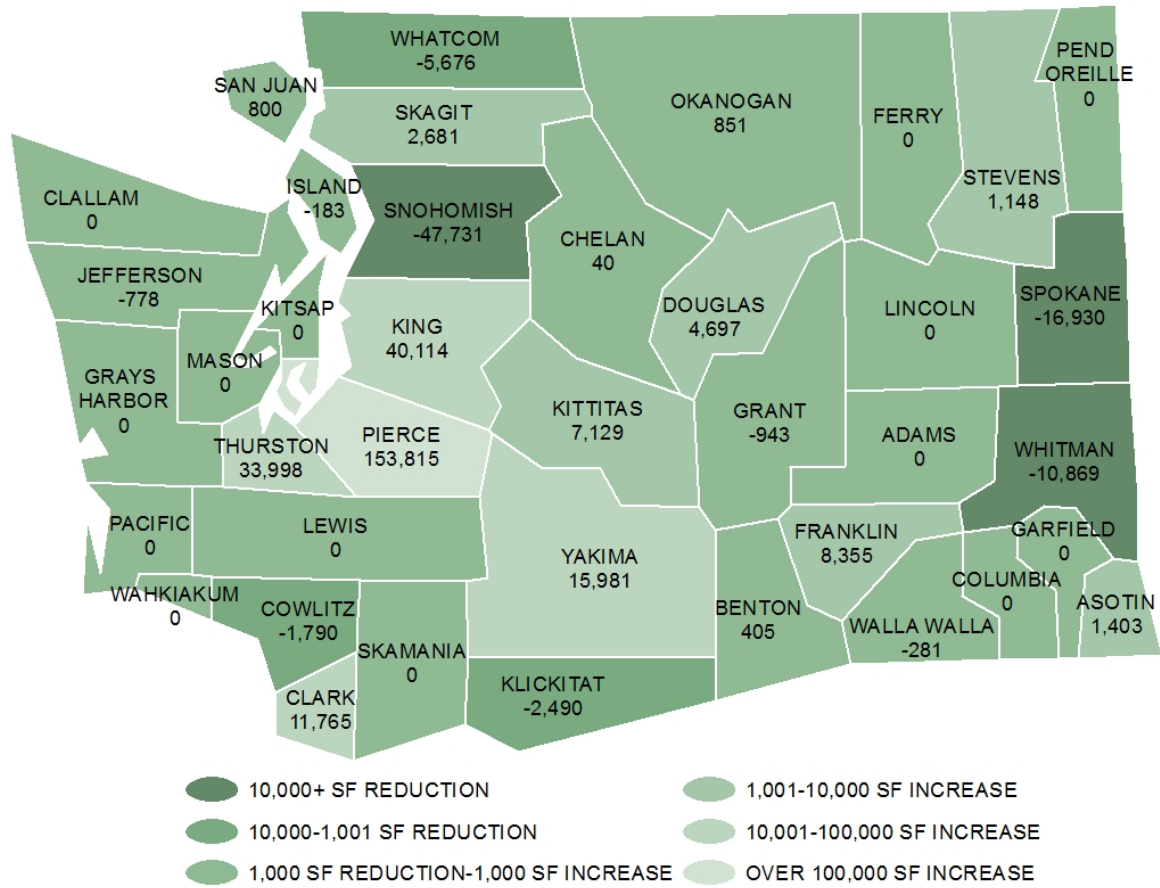

The inventory also had a measurable decrease in Spokane County as the result of the demolition of a large building on the Department of Social and Health Services' Eastern State Hospital campus.

## Leased square feet change by county

The inventory of state leased facilities increased by approximately 142,627 square feet from 2016 to 2017. Approximately 70 leased facilities were added to the state’s inventory<sup>2</sup>. The map below illustrates leased square footage change from the past year. The largest increases occurred in Pierce County as a result of a new facility leased from the federal government at Camp Murray.

<sup>2</sup> Previous reports counted a leased facility or facilities and its associated lease contract(s) as a record in the inventory. The new facilities portfolio management tool provides more visibility into leased facilities and their associated lease contracts. However, this new methodology of collecting data prevents OFM from providing an exact comparison. More information is provided in the [Summary of Leased Facilities in the Inventory](#).

## Summary of Owned Facilities in Inventory

Thirty agencies reported 9,422 owned facilities totaling 102,372,626 square feet. Based on square footage, the owned inventory represents 88.2 percent of the state's total facilities inventory.

### Owned facilities by functional area

The table below shows the total owned square feet by functional area. Higher education represented the largest single functional area with 67.4 percent of all state-owned facilities.

Owned Functional Area Breakdown				
Functional Area	Owned Square Feet	Percentage of Inventory	Owned Facilities	Percentage of Inventory
Higher Education	69,002,62	67.4	2,885	30.6
Human Services	15,105,92	14.8	1,387	14.7
General Government	7,033,87	6.9	288	3.1
Natural Resources	6,313,48	6.2	3,723	39.5
Transportation	4,175,10	4.0	1,099	11.7
Education-Other	741,600	0.7	40	0.4

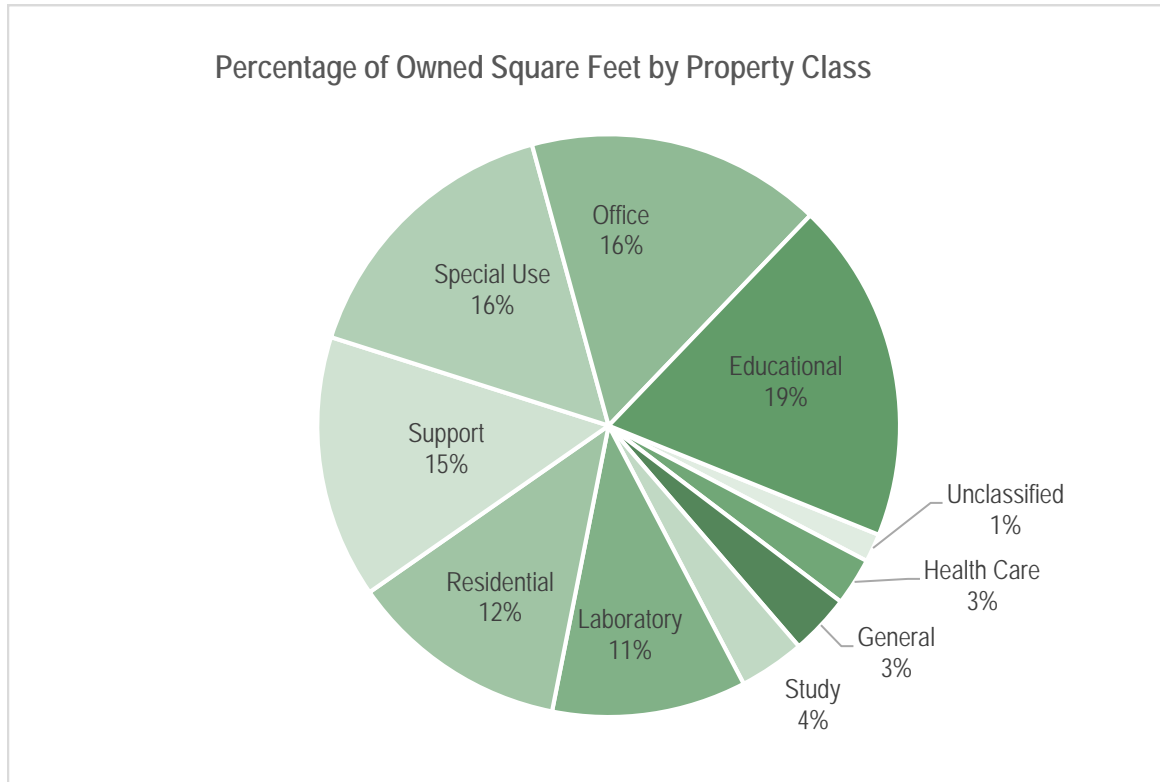

### Top agencies for owned square footage

The top 10 agencies for owned square footage represents roughly 88 percent of the owned inventory. The University of Washington, community and technical college system and Washington State University, respectively, combine for 56.2 percent of the total.

Top Agencies for Owned Square Feet		
Agency	Square Feet	Facilities
1. University of Washington	22,877,361	571
2. Community and technical college system	20,529,4	979
3. Washington State University	14,161,6	865
4. Department of Corrections	8,546,45	814
5. Department of Enterprise Services	5,276,95	90
6. Department of Social and Health Services	5,174,45	496
7. Department of Transportation	3,577,19	943
8. Western Washington University	3,469,24	118
9. Central Washington University	3,383,43	191
10. State Parks and Recreation Commission	3,049,63	2,636

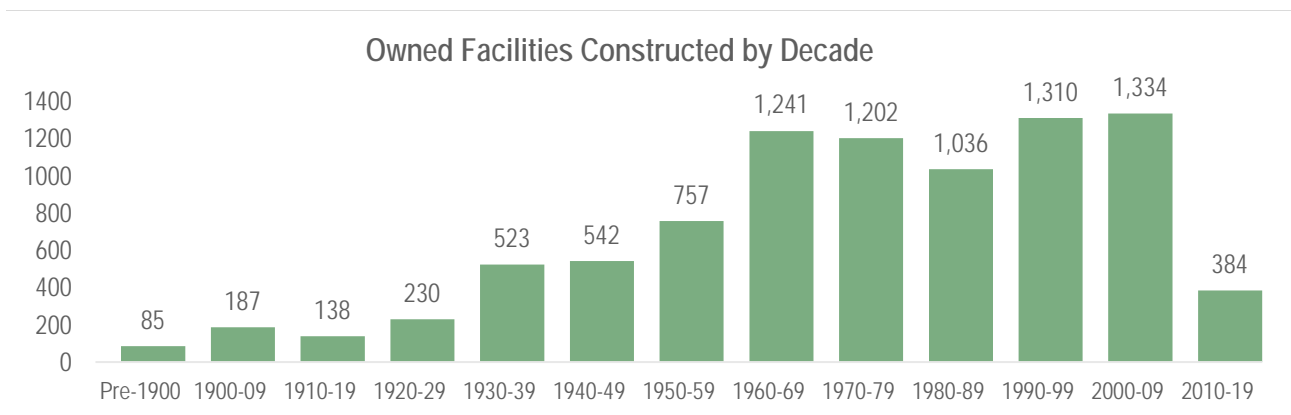

### Owned space by property classification

Property classification is organized into 10 categories, which are then further defined in nearly 40 specific space types. The property classification is defined by the primary use of the facility. The chart below depicts the percentage of facilities by property classification. Close to 50 percent of owned facilities are used for higher education classrooms, general offices and correctional facilities.

### Age of owned facilities

Today, the state owns 85 facilities constructed before 1900 and more than 300 facilities older than 100 years<sup>3</sup>. The Jackson House in Chehalis, owned by the State Parks and Recreation Commission, is the oldest facility, with a construction date of 1845. Older facilities are typically used for historic, education and residential purposes. At the other end of the spectrum, 384 facilities have been constructed since 2010.

<sup>3</sup> A total of 453 owned facilities have no reported construction date.

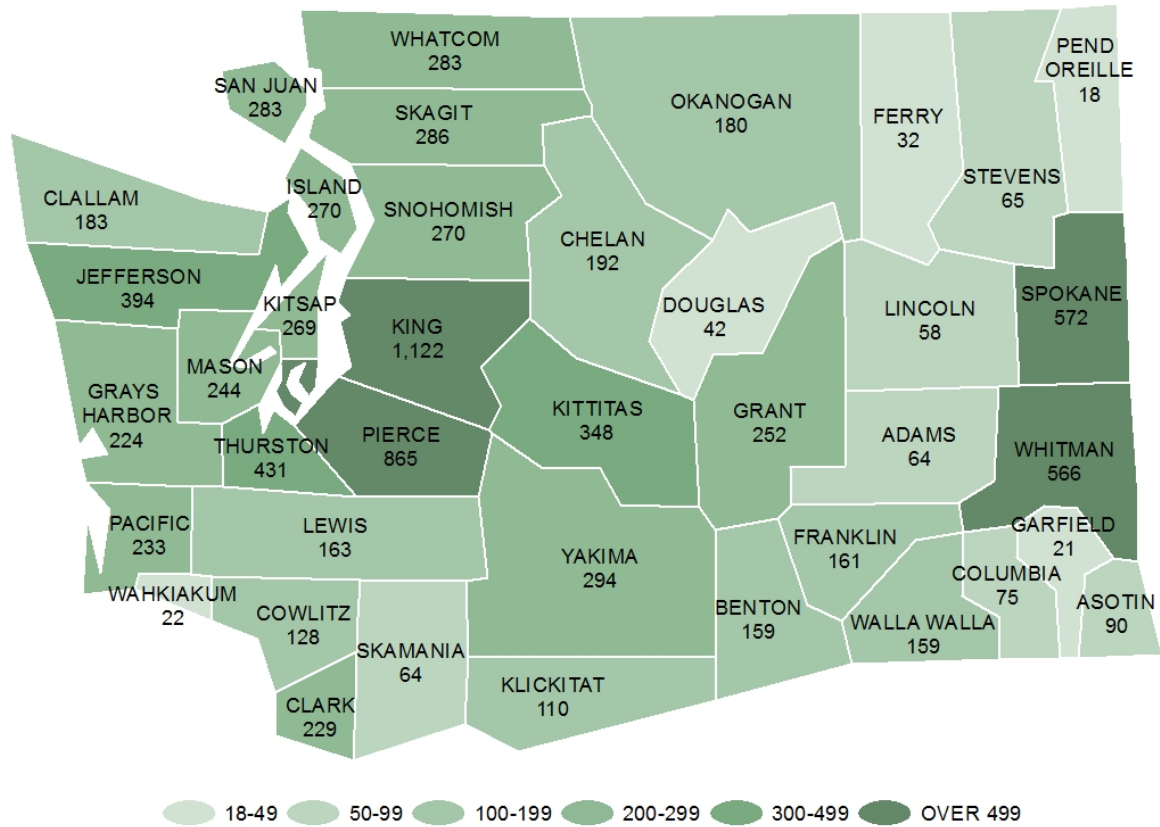

### Condition of owned facilities

Agencies were asked to rank the condition of their facilities on a scale of “1-Superior” to “5-Emergency Use Only.” Condition is assessed based on factors such as exterior, interior, lighting, maintenance levels and building system reliability. The table below shows the condition of owned facilities based on this scale, which is a high-level snapshot. A more thorough approach to condition assessment is needed for more robust information.

Owned Facility Condition Breakdown			
	Facility Condition Rating	Number of Facilities	Percentage of Inventory
1	Superior - High level of satisfaction with facility; maintenance emergencies rare	778	8.3
2	Adequate - Satisfaction with facility; usual maintenance takes about a week to complete; occasional maintenance emergencies	3,384	35.9
3	Fair - Basic level of service, lack of pride in physical exterior; maintenance takes up to one month to complete; high number of emergencies	3,307	35.1
4	Limited Functionality - Low level of service; negative experiences in functionality and responsiveness; maintenance takes up to one	1,096	11.6
5	Emergency Use Only - Services not available unless emergency; consistent customer complaints; mistrust of facility services, reactive	543	5.8
N/A	Not Assessed - Agency has not assessed facility or did not report	314	3.3

### Density of owned facilities (by county)

All 39 counties have state-owned facilities, ranging from 18 in Pend Oreille County to 1,122 in King County. King, Pierce and Thurston counties have a combined 2,418 facilities, or 25.7 percent of the owned inventory. In Eastern Washington, Spokane and Whitman counties have a total of 1,138 facilities, or 12.1 percent of the owned inventory. The map below depicts the distribution of owned facilities by county.

## Summary of Leased Inventory

Sixty-eight agencies reported 1,120 leased facilities totaling 13,647,341 square feet. Based on square footage, the leased inventory represents 11.8 percent of the state’s total facilities inventory.

The state’s new facilities portfolio management tool allows OFM to gather and report more accurate lease contract data. State agencies reported 1,075 lease contracts for these leased facilities, with a total obligation of roughly \$329 million a year. A total of 98 facilities have more than one lease contract. While most leases are for just one leased facility, the relationship between lease contracts and leased facilities varies. For instance:

- One leased facility has 15 lease contracts with multiple state agencies occupying the same facility.
- Several Washington State Parks are leased with one lease contract for 15 or more facilities. For example, this could be a single contract that covers restrooms, storage sheds, cottages and administrative offices in multiple locations/facilities.

### Leased facilities and contracts by functional area

The table below depicts the total leased square feet by functional area. Human services represented the largest single functional area, with 299 leases totaling 4,762,930 square feet, or 34.3 percent of all leased facility space.

Leased Square Footage by Functional Area						
Functional Area	Leased Square Feet	Percentage of Inventory	Leased Facilities	Percentage of Inventory	Lease Contracts	Percentage of Inventory
Human services	4,762,930	34.9	246	21.9	299	27.8
General Government	3,979,112	29.2	240	21.4	241	22.4
Higher education	3,313,850	24.3	227	20.2	277	25.8
Transportation	758,252	5.5	94	8.4	99	9.2
Natural resources	750,290	5.5	337	30.1	141	13.1
Education-Other	82,907	0.6	15	1.3	18	1.7

Leased facilities are counted multiple times when used across multiple functional areas.

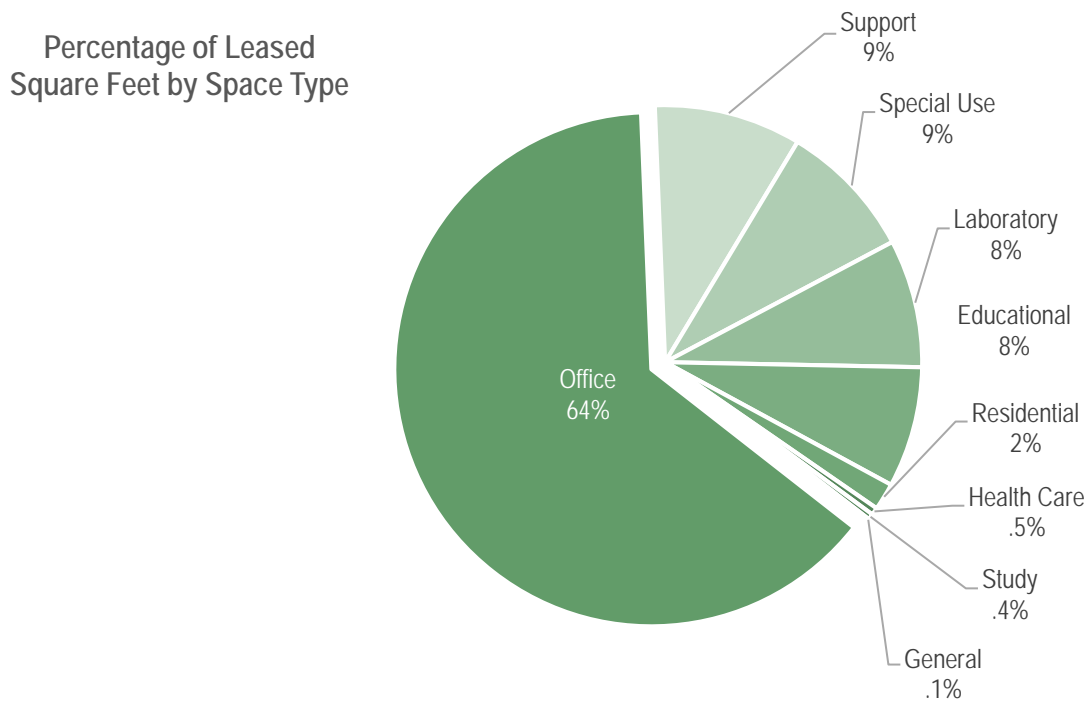

### Top agencies for leased square footage

The table below shows the top 10 agencies with the most leased square footage. The Department of Social and Health Services accounts for 19.9 percent of the total leased inventory.

Top Agencies for Leased Square Feet		
Agency	Square Feet	Leases
1. Department of Social and Health Services	2,763,311	135
2. University of Washington	1,792,853	157
3. Military Department	1,443,270	120
4. Community and technical college system	1,143,706	70
5. Office of the Attorney General	467,904	17
6. Department of Corrections	462,214	65
7. Department of Health	434,547	12
8. Employment Security Department	420,070	37
9. Consolidated Technology Services (WaTech)	389,785	4
10. Department of Licensing	363,883	56

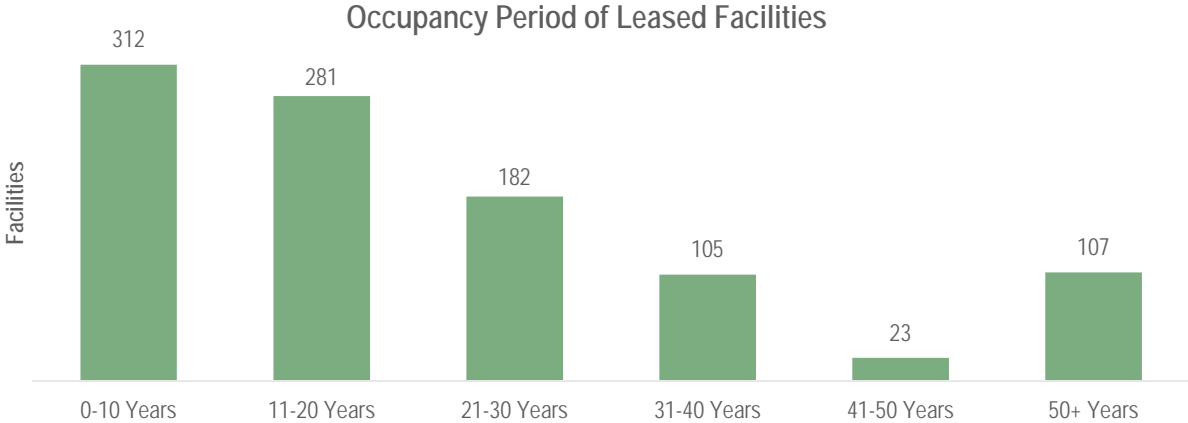

### Leased contract space by property classification

Property classification is organized into nine categories, which are then further defined in nearly 40 space types. The property classification is defined by the primary use of the facility. The chart below depicts the percentage of facilities by property classification. The inventory shows that leased facilities are used primarily for office space.

### Occupancy period of leased facilities

Agencies were asked to provide the known date when they first started leasing from their current location. A total of 130 facilities have a known occupancy of more than 40 years. Most of these facilities are used by State Parks and Recreation Commission and the Military Department. The occupancy year was not reported for 277 facilities.

### Condition of leased facilities

Agencies were asked to rank the condition of their facilities on a scale of “1-Superior” to “5-Emergency Services Only.” Condition is assessed on factors such as exterior, interior, lighting, maintenance levels and building system reliability. The table below shows the condition of state leased facilities based on this scale. A more thorough approach to condition assessment is needed for more robust information.

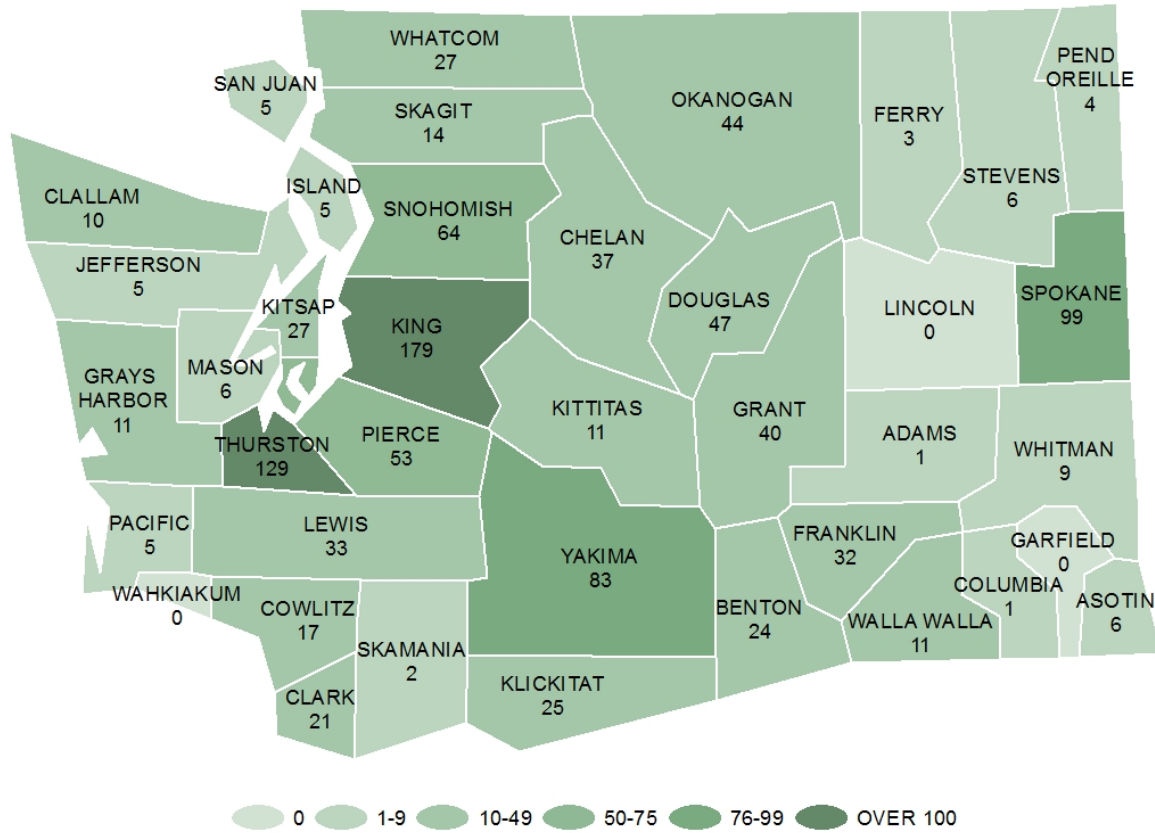

Leased Facility Condition Breakdown			
	Facility Condition Rating	Number of Facilities <sup>4</sup>	Percentage of Inventory
1	Superior - High level of satisfaction with facility; maintenance emergencies rare	122	9.5
2	Adequate - Satisfaction with facility; usual maintenance takes about a week to complete; occasional maintenance emergencies	577	44.8
3	Fair - Basic level of service, lack of pride in physical exterior; maintenance takes up to one month to complete; high number of emergencies	222	17.2
4	Limited Functionality - Low level of service; negative experiences in functionality and responsiveness; maintenance takes up to one year to complete	55	4.3
5	Emergency Services Only - Services not available unless emergency; consistent customer complaints; mistrust of facility services, reactive maintenance is the norm	4	0.3
N/A	Not Assessed - Agency has not assessed facility or did not report	307	23.9

### Density of leased facilities (by county)

<sup>4</sup> The total number of facilities in this table exceeds the total number of leased facilities because the facility condition is provided by each state agency in a collocated facility.

Thirty-six counties have leased facilities. Two counties have more than 100 leased facilities: King has 179 and Thurston has 129. Garfield, Lincoln and Wahkiakum counties have no leased facilities. The map below depicts the distribution of leased facilities by county.

## 2010–17 Facilities Inventory Trend

Since 2010, OFM has prepared a summary report of the owned and leased facilities inventory. This information equips the state of Washington to better strategize for efficiency and cost savings related to facilities. OFM has prepared a trend summary to demonstrate how the state has reported owned and leased facilities over the past eight years, shown below.

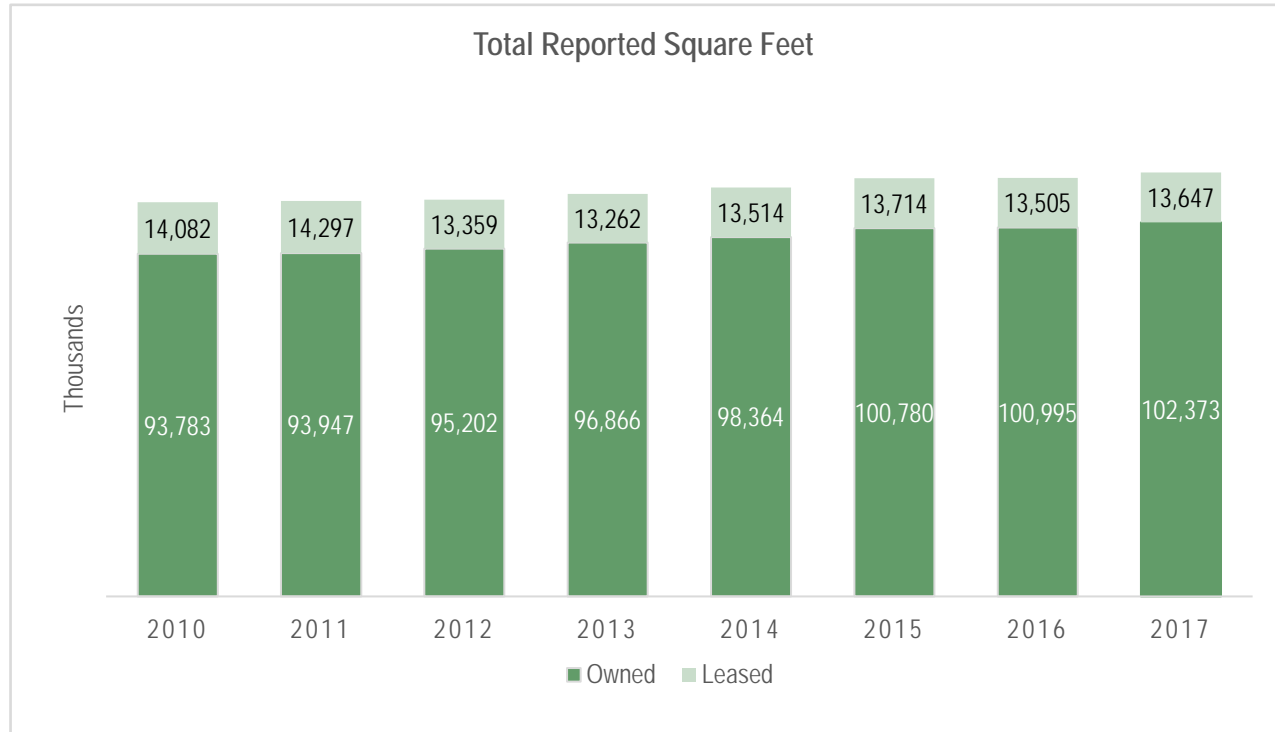

### Total state facilities by year

The eight-year trend shows the total number of state facilities reported has increased since 2010 by approximately 212 reported facilities, or more than 2.1 percent.

## Total square footage by year

The eight-year trend demonstrates that the total square footage has increased on the owned side by nearly 8,590,000 square feet. This is a combination of new construction and the identification of facilities previously underreported. The trend shows that the total square footage has decreased on the leased side by approximately 435,000 square feet.

## Contact Information
