BUDGETARY COMPARISON SCHEDULES

General Fund - Budget to GAAP Reconciliation

For the Biennium Ended June 30, 2019

(expressed in thousands)

Sources/Inflows of Resources

Actual amounts (budgetary basis) "Total Resources"	
from the Budgetary Comparison Schedule	\$ 76,690,657
Differences - budget to GAAP:	
The following items are inflows of budgetary resources but are not revenue for financial reporting purposes:	
Transfers from other funds	(5,777,284)
Budgetary fund balance at the beginning of the biennium, as restated	(2,800,959)
Appropriated loan principal repayment	(375)
The following items are not inflows of budgetary resources but are revenue for financial reporting purposes:	
Noncash commodities and electronic food stamp benefits	2,718,048
Revenues collected for other governments	233,975
Unanticipated receipts	9,440
Noncash revenues	93,235
Other	28,171
Biennium total revenues	<u>71,194,908</u>
Fiscal year 2018 total revenues, as restated for fund reclassification	(35,178,372)
Nonappropriated activity	<u>46,677</u>
Total Revenues (GAAP Basis) as reported on the Statement of Revenues, Expenditures, and Changes in Fund Balances - Governmental Funds	<u><u>\$ 36,063,213</u></u>

Uses/Outflows of Resources

Actual amounts (budgetary basis) "Total Charges to Appropriations"	
from the Budgetary Comparison Schedule	\$ 73,602,472
Differences - budget to GAAP:	
The following items are outflows of budgetary resources but are not expenditures for financial reporting purposes:	
Appropriated transfers to other funds	(2,993,490)
Other transfers to other funds	(4,777,087)
Appropriated loan disbursements	(94)
The following items are not outflows of budgetary resources but are recorded as current expenditures for financial reporting purposes:	
Noncash commodities and electronic food stamp benefits	2,718,048
Distributions to other governments	233,975
Certificates of participation and capital lease acquisitions	37,386
Expenditures related to unanticipated receipts	9,440
Other	13,474
Biennium total expenditures	<u>68,844,124</u>
Fiscal year 2018 total expenditures, as restated for fund reclassification	(33,338,355)
Nonappropriated activity	<u>720,029</u>
Total expenditures (GAAP basis) as reported on the Statement of Revenues, Expenditures, and Changes in Fund Balance - Governmental Funds	<u><u>\$ 36,225,798</u></u>

BUDGETARY INFORMATION
Notes to Required Supplementary Information

GENERAL BUDGETARY POLICIES AND PROCEDURES

The Governor is required to submit a budget to the Legislature no later than December 20 of the year preceding odd-numbered year sessions of the Legislature.

The budget is a proposal for expenditures in the ensuing biennial period based upon anticipated revenues from the sources and rates existing by law at the time of submission of the budget. The Governor may additionally submit, as an appendix to the budget, a proposal for expenditures in the ensuing biennium from revenue sources derived from proposed changes in existing statutes.

The appropriated budget and any necessary supplemental budgets are legally required to be adopted through the passage of appropriation bills by the Legislature and approved by the Governor. Operating appropriations are generally made at the fund/account and agency level; however, in a few cases, appropriations are made at the fund/account and agency/program level. Operating appropriations cover either the entire biennium or a single fiscal year in the biennium. Capital appropriations are biennial and are generally made at the fund/account, agency, and project level.

The legal level of budgetary control is at the fund/account, agency, and appropriation level, with administrative controls established at lower levels of detail in certain instances. The accompanying budgetary schedule is not presented at the legal level of budgetary control. This is due to the large number of appropriations within individual agencies that would make such a presentation in the accompanying

financial schedule extremely cumbersome. Section 2400.121 of the Governmental Accounting Standards Board Codification of Governmental Accounting and Financial Reporting Standards provides for the preparation of a separate report in these extreme cases.

For the state of Washington, a separate report has been prepared for the 2017-19 biennium to illustrate legal budgetary compliance. Appropriated budget versus actual expenditures, and estimated versus actual revenues and other financing sources (uses) for appropriated funds/accounts at agency and appropriation level are presented in the Budget-to-Actual Detail Report for governmental funds. The report is available on line at <https://www.ofm.wa.gov/accounting/financial-audit-reports/comprehensive-annual-financial-report/2019-comprehensive-annual-financial-report>.

Legislative appropriations are strict legal limits on expenditures; over-expenditures are prohibited. All appropriated and certain nonappropriated funds/accounts are further controlled by the executive branch through the allotment process. This process allocates the expenditure plan into monthly allotments by program, source of funds, and object of expenditure. State law does not preclude the over-expenditure of allotments.

Proprietary funds/accounts can earn revenues and incur expenses (i.e., depreciation or cost of goods sold) not covered by the allotment process. Budget estimates are generally made outside the allotment process according to prepared business plans. These proprietary fund/account business plan estimates are adjusted only at the beginning of each fiscal year.

Additional fiscal control is exercised through various means. OFM is authorized to estimate revenue and make expenditure allotments based on availability of unanticipated receipts, mainly federal government grant increases made during a fiscal year.

Operating encumbrances lapse at the end of the applicable appropriation. Capital outlay encumbrances lapse at the end of the biennium unless reappropriated by the Legislature in the ensuing biennium. Encumbrances outstanding against continuing appropriations at fiscal year-end are reported as restricted, committed, or assigned fund balance.

Budgetary Reporting vs. GAAP Reporting

Governmental funds are budgeted materially in conformance with generally accepted accounting principles. However, the presentation in the accompanying budgetary schedules is different in certain respects from the corresponding Statements of Revenues, Expenditures, and

Changes in Fund Balance (governmental operating statement). In the accompanying budgetary schedules, budget and actual expenditures are reported only for appropriated activities. Expenditures are classified based on whether the appropriation is from the operating or capital budget. Expenditures funded by operating budget appropriations are reported as current expenditures classified by the function of the agency receiving the appropriation. Expenditures funded by capital budget appropriations are reported as capital outlays.

However, in the governmental operating statements, all governmental funds are included and expenditures are classified according to what was actually purchased. Capital outlays are capital asset acquisitions such as land, buildings, and equipment. Debt service expenditures are principal and interest payments. Current expenditures are all other governmental fund expenditures classified based on the function of the agency making the expenditures.

Certain governmental activities are excluded from the budgetary schedules because they are not appropriated. These activities include activities designated as nonappropriated by the Legislature. Nonappropriated activities can represent a portion of a fund such as the Higher Education Special Revenue Fund or all of a fund such as the Higher Education Endowment and Tobacco Settlement Securitization Bond Debt Service Funds. Additionally, certain items including federal surplus food commodities, electronic food stamp benefits, and resources collected and distributed to other governments are also excluded because they are not appropriated.

Further, certain expenditures are appropriated as operating transfers. These transfers are reported as operating transfers on the budgetary schedules and as expenditures on the governmental operating statements.

In the General Fund, Budgetary Fund Balance equals restricted fund balance reduced by a portion that is not available for budgeting, committed, and unassigned fund balances as reported on the Governmental Funds Balance Sheet. In the Higher Education Special Revenue Fund, Budgetary Fund Balance equals the sum of restricted and committed fund balance as reported on the Governmental Funds Balance Sheet. In all other funds except Wildlife and Natural Resources, Budgetary Fund Balance equals total fund balance less nonspendable fund balance as reported on the Governmental Funds Balance Sheet. The Budgetary Fund Balance in the Wildlife and Natural Resources fund is further reduced by a portion of restricted fund balance that is not available for budgeting.

PENSION PLAN INFORMATION

Notes to Required Supplementary Information

Methods and assumptions used in calculations of Actuarially Determined Contributions for PERS, TRS, PSERS, LEOFF, and WSPRS. The Office of the State Actuary (OSA) calculates the Actuarially Determined Contributions (ADC) based on the results of an actuarial valuation consistent with the state's funding policy defined under chapter 41.45 of the Revised Code of Washington (RCW). Consistent with the state's contribution rate adoption process, the results of an actuarial valuation with an odd-numbered year valuation date determine the ADC for the biennium that ensues two years later. The actuarial valuation with a June 30, 2015, valuation date, completed in the fall of 2016, determined the ADC for the period beginning July 1, 2017, and ending June 30, 2019.

Methods and assumptions used in calculations of the ADC for JRS and Judges. The OSA calculates the ADC based on the results of an actuarial valuation, and sets the ADC equal to the expected benefit payments from the plan. Consistent with the state's funding policy defined under RCWs 2.10.90 and 2.12.60, the Legislature makes biennial appropriations in order to ensure the fund is solvent to make the necessary benefit payments.

OSA calculates the ADC consistent with the methods described above. Adopted contribution rates may be different pending the actions of the governing bodies. For instance, for the period beginning July 1, 2015, and ending June 30, 2017, the contribution rates adopted by the Pension Funding Council, and unchanged by the Legislature, reflect a phase-in of the increase to contribution rates that resulted from a change to the mortality assumption. This is the second of three biennia over which this increase is expected to be phased-in for PERS 1/2/3, TRS 1/2/3, PSERS 2, and WSPRS 1/2.

2010	2,800	6,787	(3,987)

Notes: Neither covered payroll nor contributions as a percentage of covered payroll are applicable. This is a volunteer organization.

Beginning in 2017, the methodology for determining the Actuarially Determined Contributions was revised to reflect the timing of the contributions based upon the Board for Volunteer Firefighters adoption cycle and the actuarial funding methods selected.

Prior to 2014, the Annual Required Contribution amounts are presented for the Actuarially Determined Contributions.

Figures may not total due to rounding.

**Volunteer Fire Fighters’ and Reserve Officers’ Relief and Pension Fund
Notes to Required Supplementary Information**

The Office of the State Actuary (OSA) calculates the Actuarially Determined Contributions (ADC) based on

the results of an actuarial valuation consistent with funding policy defined under chapter 41.24 RCW and adopted policies made by the State Board for Volunteer Fire Fighters and Reserve Officers. Consistent with the Board’s contribution rate adoption process, the results of an actuarial valuation determine the ADC two years after the valuation date. For example, the actuarial valuation with a June 30, 2017, valuation date, completed in the fall of 2018, determines the ADC for the period ending June 30, 2019.

**Higher Education Supplemental Defined
Benefit Plans**
**Notes to Required Supplementary
Information**

The Higher Education Supplemental Retirement Plans are financed on a pay-as-you-go basis. State institutions of higher education make direct payments to qualifying retirees

when the retirement benefits provided by the fund sponsors do not meet the benefit goals. No assets are accumulated in trusts or equivalent arrangements.

Potential factors that may significantly affect trends in amounts reported include changes to the discount rate, salary growth, and the variable income investment return.

OTHER POSTEMPLOYMENT BENEFITS INFORMATION

Schedule of Changes in Total OPEB Liability and Related Ratios

Total OPEB Liability - Ending	\$ 5,079,882	\$ 5,825,822
Covered-employee payroll	\$ 8,401,635	\$ 7,878,188
Total OPEB liability as a percentage of covered-employee payroll	60.46 %	73.95 %

*This schedule is to be built prospectively until it contains ten years of data.

Note: Figures may not total due to rounding.

Source: Washington State Office of the State Actuary

Notes to Required Supplementary Information

The Public Employees' Benefits Board OPEB plan does not have assets in trusts or equivalent arrangements and is funded on a pay-as-you-go basis.

Potential factors that may significantly affect trends in amounts reported include changes to the discount rate, health care trend rates, salary projections, and participation percentages.

Total OPEB liability beginning balance for the measurement date of June 30, 2018, was restated to reflect the changes in proportion between the state and the Washington Economic Development Finance Authority which operates on a cash basis and does not report an OPEB liability. The restatement also includes OPEB amounts for the Health Care Benefits Exchange which was omitted from the table in the prior year.

Infrastructure Assets Reported Using the Modified Approach

Condition Assessment

The state of Washington reports certain networks of infrastructure assets under the modified approach of the Governmental Accounting Standards Board Statement No. 34. Expenditures to maintain and preserve these assets are budgeted, recorded, and reported in lieu of depreciation expense. The state must meet the following requirements to report networks of assets under the modified approach:

- Maintain an up-to-date inventory of eligible infrastructure assets in an asset management system.
- Disclose the condition level at which assets are to be

preserved or maintained, as established by administrative or executive policy, or by legislative action.

- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Document that assets are being preserved approximately at or above the disclosed condition level.
- Annually estimate the cost to maintain and preserve the assets at the established condition level.

Assets accounted for under the modified approach include the state of Washington's network of highway pavements, bridges, and rest areas. In fiscal year 2019, the state was responsible for maintaining and preserving 20,815 pavement lane miles, 3,932 bridges and tunnels, and 47 highway safety rest areas.

PAVEMENT CONDITION

The Washington State Department of Transportation (WSDOT) performs highway pavement assessments over a two year cycle utilizing three measurements to develop a scaled condition assessment: Pavement Structural Condition (PSC), International Roughness Index (IRI), and rutting.

The WSDOT uses the following rating scale for PSC:

Category	PSC Range	Description
Very Good	80 - 100	Little or no distress. Example: Flexible pavement with 5% of wheel track length having "hairline" severity alligator cracking will have a PSC of 80.
Good	60 - 79	Early stage deterioration. Example: Flexible pavement with 15% of wheel track length having "hairline" alligator cracking will have a PSC of 70.
Fair	40 - 59	This is the threshold value for rehabilitation. Example: Flexible pavement with 25% of wheel track length having "hairline" alligator cracking will have a PSC of 50.
Poor	20 - 39	Structural deterioration. Example: Flexible pavement with 25% of wheel track length having "medium (spalled)" severity alligator cracking will have a PSC of 30.
Very Poor	0 - 19	Advanced structural deterioration. Example: Flexible pavement with 40% of wheel track length having "medium (spalled)" severity alligator cracking will have a PSC of 10. May require extensive repair and thicker overlays.

The IRI scale is measured in inches per mile. WSDOT assesses pavement with a ride performance measure less than 221 inches per mile to be in fair or better condition.

Rutting is measured in inches with a measurement of 0.58 inches or less assessed at a condition of fair or better.

PSC, IRI, and rutting are combined to rate a section of pavement which is assigned the lowest condition of any of the three indices.

The following table shows the combined conditions and the ratings for each index:

Category	PSC	IRI	Rutting
Very Good	80 - 100	< 96	< 0.24
Good	60 - 79	96 - 170	0.24 - 0.41
Fair	40 - 59	171 - 220	0.42 - 0.58
Poor	20 - 39	221 - 320	0.59 - 0.74
Very Poor	0 - 19	> 320	> 0.74

The WSDOT's policy is to maintain 85 percent of pavements at a condition level of fair or better, based on an average condition level of the last three assessments.

The following table shows pavement condition ratings for state highways:

Pavements			
Percentage in Fair or Better Condition			
Two-Year Cycle Ending Calendar Year			
2017	2015	2013	Average of Last Three Assessments
93.2%	93.2%	92.8%	93.1%

The following table reflects the state's estimated and actual expenditures necessary to preserve state highways at the established condition level:

Pavements					
Preservation and Maintenance - Planned to Actual - Fiscal Year					
<i>(expressed in thousands)</i>					
	2019	2018	2017	2016	2015
Planned	\$ 227,625	\$ 263,555	\$ 304,040	\$ 160,423	\$ 173,716
Actual	269,236	271,474	264,315	161,211	142,789
Variance	\$ (41,611)	\$ (7,919)	\$ 39,725	\$ (788)	\$ 30,927
	-18.3%	-3.0%	13.1%	-0.5%	17.8%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activities in response to economic forecasts and other factors.

For more information about pavements, refer to the WSDOT's website at: <http://www.wsdot.wa.gov/Business/MaterialsLab/Pavements/default.htm>.

BRIDGE CONDITION

The WSDOT inspects and performs condition assessments every two fiscal years on all of the 3,344 state-owned bridges in excess of 20 feet in length. Underwater bridge components are inspected at least once every five years in accordance with Federal Highway Administration (FHWA) requirements.

The WSDOT uses a performance measure established in FHWA's *Recording and Coding Guide for the Structural Inventory and Appraisal of the Nation's Bridges*, which classifies the physical condition of bridges as good, fair, or poor based on structural sufficiency standards for the following bridge components: bridge superstructure, substructure, and deck. The appraisal data is collected in the National Bridge Inventory (NBI) and assigned a code from 0 to 9, with 0 being in a failed condition and 9 being in excellent condition.

Category	National Bridge Inventory Code	Description
Good	7 or 8	A range from no problems noted to some minor problems.
Fair	5 or 6	All primary structural elements are sound but may have deficiencies such as minor section loss, deterioration, cracking, spalling, or scour.
Poor	4 or less	Advanced deficiencies such as section loss, deterioration, cracking, spalling, scour, or seriously affected primary structural components.

The WSDOT's policy is to maintain 90 percent of bridges at a condition level of fair or better, based on an average condition level of the last three assessments.

The following table shows condition ratings for state bridges:

Bridges			
Percentage in Fair or Better Condition			
Two-Year Cycle Ending Fiscal Year			
2019	2017	2015	Average of Last Three Assessments
92.9%	91.8%	92.1%	92.3%

The following table reflects the state's estimated and actual expenditures necessary to preserve the bridges at the established condition level:

Bridges					
Preservation and Maintenance - Planned to Actual - Fiscal Year					
<i>(expressed in thousands)</i>					
	2019	2018	2017	2016	2015
Planned	\$ 182,409	\$ 106,595	\$ 45,891	\$ 75,160	\$ 71,078
Actual	146,816	87,068	45,088	66,339	64,060
Variance	\$ 35,593	\$ 19,527	\$ 803	\$ 8,821	\$ 7,018
	19.5%	18.3%	1.7%	11.7%	9.9%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activities in response to economic forecasts and other factors.

For more information about bridges, refer to the WSDOT's website at: <http://www.wsdot.wa.gov/Bridge/Structures/>.

SAFETY REST AREA CONDITION

The WSDOT performs condition assessments on safety rest areas every two fiscal years. Sites and buildings are divided into functional components that are assessed with a five-tiered condition scale: excellent, good, fair, poor, and unacceptable condition. The rating is based on guidelines and parameters established by the WSDOT Capital Facilities Program, and weighted by the criticality of the functional component.

The WSDOT's policy is to maintain 95 percent of safety rest areas in a condition of fair or better, based on an average condition level of the last three assessments.

The following table shows condition ratings for safety rest areas:

Safety Rest Areas			
Percentage in Fair or Better Condition			
Two-Year Cycle Ending Fiscal Year *			
2019	2017	2015	Average of Last Three Assessments
97.8%	100.0%	100.0%	99.3%

* In 2019, the reporting methodology was changed from calendar year basis to fiscal year basis to align with the WSDOT accounting policy.

The following table reflects the state's estimated and actual expenditures necessary to preserve the safety rest areas at the established condition level:

Safety Rest Areas										
Preservation and Maintenance - Planned to Actual - Fiscal Year										
<i>(expressed in thousands)</i>										
		2019		2018		2017		2016		2015
Planned	\$	11,084	\$	9,609	\$	9,964	\$	7,204	\$	8,463
Actual		9,004		7,986		8,011		7,185		8,369
Variance	\$	2,080	\$	1,623	\$	1,953	\$	19	\$	94
		18.8%		16.9%		19.6%		0.3%		1.1%

Actual expenditures may vary from planned amounts for a variety of reasons which include, but are not limited to, management's decision to accelerate, defer, or reduce preservation or maintenance activities in response to economic forecasts and other factors.

For more information about safety rest areas, refer to the WSDOT's website at: <http://www.wsdot.wa.gov/safety/restareas>.
