

Small Area Estimates Program, Readme

Washington State Office of Financial Management, Forecasting and Research Division

December 13, 2023

The population and housing estimates created in these tables come from OFM's Small Area Estimates Program (SAEP), with the geographies derived from the Census Bureau's TIGER 2020 shapefiles. The data tables include the 2020 Census (P.L. 94-171) values for population and housing for the user to compare with OFM's adjusted 2020 Census numbers. More information about how these estimates were developed can be found from the [SAEP User Guide](#). SAEP is updated annually, and prior year's estimates will change as more data become available.

The TIGER shapefiles are the same as those found on OFM's [website](#), with a few exceptions. The 2022 Congressional and Legislative Districts were created by grouping 2020 Census blocks according to their respective districts as assigned by the Washington State Redistricting Commission. The Selected Islands geography was also created by combining census blocks on Washington islands, and it is not a TIGER geography. For more information about Washington's TIGER shapefiles, look [here](#).

Shapefile variable descriptions are on the next page.

Data Columns

POP2010	2010 Census Total Population
POP2011	Estimated Total Population 2011
